Following on from Joss' comments on doing something special for the Wasdale 2000, we have had some more good ideas put forward to add to that of changing the course and starting from the youth hostel. One was to run the race backwards, the course not the runners, at least I think that's what he meant! But the committee felt this might make the event even more formidable than it already is and put some people off. Another idea that we quite liked is that everyone gets sponsorship for the event for either a charity of their own choice or to be split between our choice of donating to multiple sclerosis and mountain rescue. Following the tradition of many sponsored events runners can chose to come in fancy dress if they wish, providing safety is not breached and the rule of bringing full body cover etc. would still be enforced. Also several specially designed certificates, for the year 2000 only, would be given to everyone who entered whether they finished or not. For example gold, silver and white certificates would be given to finishers and be similar to the existing ones given out normally. But another range of certificates would be available for retirement and timed-out non-finishers dependent upon which checkpoint they last ran through. These certificates would act as proof of race entry and achievement for sponsorship and personal purposes. Competitors would be expected to collect their own sponsorship money and send it to their own chosen charities, or send the total amount to us to pass on to ours. There would also be a special prize available later to the runner who can prove they have collected the most money. If anyone has any more ideas or views please let us know by the end of September so we can decide in our annual committee meeting and get what is decided published in the FRA Calendar for next year.
